Abhi Varde

Product Engineer · Full Stack & AI · Surat, India · Open to Remote or Relocation
+91 99253 68660 | abhivarde99@gmail.com | github.com/AbhiVarde | abhivarde.in | linkedin.com/in/abhi-varde
Ships AI agents, developer tools, and design systems from idea to production

PROJECTS

TryEve | *AI Agent Builder* — Vercel Sandbox · Workflow SDK · AI SDK · AI Gateway

- Built an agent builder that turns a plain-English prompt into a working eve agent, tested live in a Vercel Sandbox
- Ran generation and testing as one durable Workflow SDK step, with a Cron job that clears abandoned sandboxes
- Guarded against abuse and cost with BotID, prompt preflight scoring, per-visitor rate limits, and sandbox caps
- Added one-click deploy to the user's own GitHub and Vercel accounts using short-lived tokens, storing no secrets

Sync UI | *Design System* — 120+ GitHub Stars · Vercel OSS Program Spring '26

- Built a design system on MUI and Motion with 125+ components, 13+ blocks, and 12+ animated chart variants
- Distributed through a CLI, copy-paste code, and a hosted JSON registry, so new entries go live on every deploy
- Built an MCP server and an agent skill so AI coding agents like Claude Code and Cursor can add components
- Extended support to Vite, Astro, TanStack Start, and React Router; published the CLI and MCP server on npm

EXPERIENCE

Open Source Contributor — Remote
Independent — Oct 2025 – Present

- Merged 15 pull requests across the open-source repositories of Vercel, Supabase, Better Auth, and Appwrite
- Shipped 8 merged fixes that made Better Auth's Better Hub fully responsive and usable on mobile devices
- Co-authored a DataForSEO MCP integration that was merged into Vercel's open-source eve framework repository
- Named as an outside contributor in Appwrite's Arena launch blog for merged contributions to its repositories

Mozie (Synapticks Technologies) — Remote
Frontend Engineer — Jun 2026 – Jul 2026

- Built the frontend for creator and brand onboarding, authentication, dashboards, payouts, and account settings
- Designed a mobile-first UI for phones and a separate desktop experience, both on one shared component library
- Integrated Meta and Instagram into the creator and brand onboarding flows and dashboards of the AI platform

Uniqual ITech — On-site
Frontend Engineer (promoted from Jr Frontend Engineer) — Oct 2023 – Oct 2025

- Built and shipped the frontend for 25+ production React and Next.js apps serving 50k+ users over two years
- Reduced load times by up to 50% across production apps using code splitting, lazy loading, and CDN caching
- Integrated Stripe, Razorpay, Firebase, and AWS to add payments and authentication across 10+ production apps
- Mentored junior engineers and shipped multi-platform web products alongside the iOS, Android, and QA teams

SKILLS

Language	TypeScript, JavaScript
Frontend	React, Next.js, TanStack Start, Tailwind CSS, shadcn/ui, Material UI, Motion, Zustand, Redux
Backend	Node.js, SQL, Supabase, Appwrite, Firebase, Redis, WebSockets, SSE, Stripe, Razorpay, Resend
AI	AI SDK, MCP, eve, AI Gateway, OpenRouter, Groq, Exa
Infrastructure	Vercel (Sandbox, Workflow SDK, Flags SDK, BotID, Firewall, Blob, Cron), AWS, GitHub Actions
Workflow	Git, GitHub, Claude Code, Cursor, Codex
Design	Figma, Paper

EDUCATION

Gujarat Technological University — 2023
Bachelor of Engineering, Computer Science and Engineering — Patan, Gujarat, India
