Building production AI agent systems and open-source developer infrastructure

EXPERIENCE

Open Source Contributor

Remote

Vercel · Supabase · Better Auth · Appwrite

Oct 2025 – Present

- Authored 36 PRs across Vercel, Supabase, Better Auth, and Appwrite; 15 merged into production
- Built TryEve on Vercel's eve, then contributed 2 PRs upstream: DataForSEO MCP connection and a harness fix
- Sole outside contributor credited in Appwrite's Arena launch blog; awarded Featured Project of the Month
- Shipped 8 merged fixes to Better Auth's Better Hub, making the interface responsive and usable on mobile

Mozie (Synapticks Technologies)

Remote

Frontend Engineer

Jun 2026 – Jul 2026

- Spearheaded frontend for creator and brand onboarding, authentication, dashboards, payouts, and account settings
- Architected a dual-interface system: purpose-built mobile-native UI for phones and a distinct desktop experience
- Streamlined user journeys with a reusable component library and seamless Meta and Instagram integrations

Uniquel ITech

On-site

Frontend Engineer (promoted from Jr Frontend Engineer)

Oct 2023 – Oct 2025

- Built and shipped 25+ production-grade React and Next.js applications, serving 50k+ users across platforms
- Cut load times by up to 50% across production apps using code splitting, lazy loading, and CDN caching
- Integrated Stripe, Razorpay, Firebase, and AWS across 10+ apps for payments and authentication
- Owned frontend delivery end to end, mentored junior engineers, and shipped with iOS, Android, and QA teams

PROJECTS

TryEve | AI Agent Builder

Vercel Sandbox · Workflow SDK · AI SDK · AI Gateway

- Engineered an AI agent pipeline on Next.js, converting natural language prompts into production eve agents
- Enforced runtime correctness by verifying every agent in an isolated Vercel Sandbox before user exposure
- Architected a durable Workflow SDK pipeline with crash recovery, eliminating data loss on failures
- Automated agent deployment to user-owned GitHub and Vercel accounts via scoped OAuth, no stored credentials

Sync UI | UI System

120+ GitHub Stars · Vercel OSS Program Spring '26

- Architected a 125+ component UI system with 13+ blocks and 12 chart variants using MUI and Motion
- Built a multi-channel distribution layer: CLI installer, copy-paste code, and a hosted JSON component registry
- Developed an MCP server and agent skill letting AI coding agents install components without manual lookup
- Extended framework support to Vite, Astro, TanStack Start, and React Router; published on npm
